Track 11: E-Government

Track Co-Chairs

Antonio Cordella,

ISIG group Department of Management LSE

Angeliki Poulymenakou, akp@aueb.gr

Department of Management Science and Technology, AUEB

Introduction

The increasing interest in information systems as a means to modernise public sector organisations is opening challenging questions regarding the impact these initiatives have on the organisation of the public sector, the relationships of government with citizens as well as with businesses, and the wider societal implication the digitalisation of public administration can have.

This track calls for papers addressing these issues from a multitude of theoretical perspectives willing to generate a multidisciplinary debate about the subject.

We are looking to equally attract theoretical contributions as well as rich empirical work (case studies, national surveys, etc.) on topics that include but are not limited to:

- The unique character of government as a site for technology based innovation;
- Change in government functions and practices enabled by e-government initiatives;
- Changes in public administration policies
- Institutional perspectives on e-government
- Technological challenges in e-government projects
- Management of e-government initiatives
- E-government project evaluation
- E-government applications and experiences (G2C, G2B, G2G, G2NGO)
- The consequences of e-government on relationships between government, citizens and the private sector

BIOS of track co-chairs

Dr Antonio Cordella is Lecturer in Information Systems at the London School of Economics and Political Science. His research interests cover the areas of E-government, Economic Theories of Information Systems, and the Social Studies of Information Systems.

Dr Angeliki Poulymenakou is Associate Professor of Information Systems at the Athens University of Economics and Business. Her research interests regarding e-government focus on issues of implementation, organisational adoption, diffusion and change
